

A NOT-FOR-PROFIT MOVEMENT • FOUNDING COHORT FORMING NOW

## Who's building the autonomous age — on purpose?

The Possible is a **not-for-profit** build-tank, not a think-tank — founders, operators, investors and thinkers turning responsible ideas into working systems. A community forming a movement.

FOUNDING COHORT FORMING NOW

NOT-FOR-PROFIT

NO MEMBERSHIP FEES

TRUST IS THE NEW REACH

EVERYONE WINS

## Four worlds. One table. Every seat gains.

### FOUNDERS

#### More than a prototype.

Access to builders to make your idea real — when the cost of entry would otherwise be prohibitive. The build is **micro-funded and transparent**. And you don't just leave with a working prototype: you leave with a **founding network** who've done the impartial first sweep and validation — and who'll back you.

### PENNY ANGELS • INVESTORS

#### Back working prototypes. Not slides.

**First look. First access. First trust.** Stop missing ideas until it's too late. At this early stage you're a **penny angel** — **ultra-low risk, potential high reward**. Micro-fund the build (typically **\$50–\$200**, transparent — AI tokens, coding tools) to understand the founder and earn trust before a cent is at risk. Then feel, touch and understand a working prototype, not a Figma — and if you like it, **first dibs** to back it further as an investor.

### Builders

THE HANDS ON THE TOOLS

#### AT THE CENTRE OF EVERY BUILD

The sharpest, **industry-hardened builders** — from **deep tech** to **application architecture** and **enterprise** — using leading-edge principles. Real hands on the tools, not theory; **hands-on CTOs**, **not jazz hands**. **First dibs** to take a build further, plus recommendations, engagements and reputation — all earned on **what you can show and do**.

### OPERATORS

#### De-risk before the big spend.

Surface the **unknown unknowns** early — save cost and set up the bigger venture, or learn it's a no **now** rather than years down the line.

### THINKERS

#### Spark ideas, shape products.

Bring new ideas and fresh ways to **innovate** — help shape the product and the guardrails from the first sketch. Onboard later as **advisory**, or take the role further.

#### Marketers

Craft a good idea into an **exceptional one** — resonate with the right audiences, and how to reach them. **Growth.**

#### CFOs & accountants

Frame the value exchange, **costs and risks**; shape the funding model.

#### Lawyers

Surface the **legal walls** early — or get past them, thoughtfully.

#### Head hunters

Build the team — **early access to people**, plus the availability of skills and market rates, up front.

And every seat **mentors the others** — founders, penny angels, operators and thinkers, teaching and learning across one table.

## This isn't another chat forum. It's a **build room**.

The Possible **elevates and funnels the best of the community forum into the Build Tank** — where talk becomes a build. Feel it, touch it, understand it — proof you can hold, not slides you scroll past.

HOW TO JOIN · THE DOOR

# Two doors in. **The room decides.**

### 1 Get in

No open sign-up. Come on a member's recommendation — just an email — or apply with your LinkedIn.

### 2 The room votes

Members vouch for you. A few endorsements and you're in; the room can veto too. Trust decides.

### 3 Take your seat

Reach the bar and a magic-link invite lands. You're inside.

[Apply to join →](#)

All you need: an email — and your LinkedIn if you're applying directly rather than on a recommendation.

#### HOUSE RULES

### What's said in the room stays in the room.

Private, not bulletproof. Keep it non-personal and non-controversial. Never use what's said as leverage over another. Bring something to the table.

#### FOUNDING PRINCIPLE

### Be yourself. Bring your strengths.

Judge people by their character, their actions and what they contribute — not by the packaging they arrived in.

#### ABOUT THE FOUNDERS

**Justin James & Veronica James** — founders of The Possible, part of Agencie.io Labs. Building the people, principles and products for a trustworthy autonomous age, and bringing the right people to the fire.
